

Introduction to Simplifying Expressions with Division

Simplify where possible:

1. $2a \div 2$

2. $20a \div 5$

3. $10a \div 2$

4. $15b \div 5b$

5. $\frac{12c}{3}$

6. $\frac{20d}{5d}$

7. $\frac{-35k}{5}$

Fill in the missing terms:

8. $8f \div \square = 4f$

9. $12h \div \square = 4$

10. $\frac{10g}{\square} = 2g$
