SURPLUS SUBSTATION EQUIPMENT

Unused & Reconditioned Substation Equipment

Power transformers, SF6 & vacuum circuit breakers, and utility switchgear — sourced, qualified, and U.S.-stored for immediate or scheduled delivery to utility, industrial, IPP and EPC end users.

CURRENT AVAILABILITY AS OF **JUNE 15, 2026**

Actively sourcing: demand is high for **345 kV, 200 MVA+ MPTs**. Holding inventory of this class? We are positioned to help you move it.

Availability & specifications. All units are offered subject to prior sale and to written confirmation of technical particulars, condition, warranty status, and current location. Nameplate ratings, winding configurations, safe-harbor dates, warranty terms, and delivery estimates are furnished by upstream suppliers and are believed reliable but are not warranted by CTG Power Systems Intl., LLC and are subject to verification and change without notice. Manufacturer names denote the original equipment manufacturer of the unit only and do not imply any agency, sponsorship, or endorsement.

Commercial model. CTG Power Systems Intl., LLC transacts on a direct, negotiated, sole-source basis with qualified end users only — not through competitive tenders or third-party intermediaries. Terms are USD-only against confirmed irrevocable letter of credit or wire transfer. No back-charges, buy-backs, or brokered re-sale arrangements are offered. **Export & compliance.** All transactions are subject to U.S. export-control and sanctions law (OFAC / BIS / EAR) and to counterparty due-diligence screening. CTG Power Systems Intl., LLC reserves the right to decline any inquiry that cannot be cleared. **No offer.** This document is a summary of indicative availability for informational purposes only and does not constitute an offer, quotation, or binding commitment. A binding obligation arises only upon a mutually executed written agreement. © 2026 CTG Power Systems Intl., LLC. All rights reserved.
