

# SoilPlus Chick

Pellet fertilizer made from 100%  
composted poultry manure

Natural nutrition for healthy plant growth

## Product Overview:

- **SoilPlus Chick** is a natural, sterilized fertilizer made from 100% locally sourced composted chicken manure.
- With an NPK of 4.0–2–2, and high levels of organic matter and humic substances, it supplies essential nutrients to support strong, healthy plant growth.
- It is suitable for use in open fields, orchards, greenhouses, and home gardens, and is fully compatible with natural farming systems.

## Sustainability:

Made from composted poultry manure, SoilPlus Chick reduces unmanaged disposal and returns valuable nutrients to the soil, supporting circular agriculture and eco-conscious farming.

## Benefits for Farmers:

- High in nitrogen: supports vegetative growth and leaf development
- Boosts soil fertility with organic matter and humic acid
- Improves root development and crop yield
- Fully composted and pelletized for clean, easy application
- Safe, sterilized, and suitable for all types of crops.

# Usage Guidelines

## Instructions:

Apply 3–5 days before planting or directly at planting by mixing the pellets into the soil (10–15 cm deep). For existing crops and trees, apply around the base at a safe distance, and water well to activate nutrient release. Reapply every 3–4 months if needed.

## Usage Quantities:

### Fruit Trees:

2–4 kg per tree per season

### Vegetables:

General crops (lettuce, cabbage, beans, peas, herbs, leafy greens, potatoes, onions, garlic, carrots, etc.): 150–200 kg/dunum

High-demand crops (tomatoes, cucumbers, eggplants, peppers, zucchini, watermelon): 150–180 kg/dunum

### Houseplants & Pots:

40–50 g per 5-liter pot

Recommended quantities are based on nutrient levels in composted poultry manure. Application rates may vary with soil, crop, and climate.

For best results, especially in large-scale farming, soil testing and expert advice are recommended.

# Characteristics:

Dark brown pellets with a natural manure odor.

Moisture	8.99%
Organic Matter	73.50%
Carbon	42.73%
Nitrogen (N)	4.08%
Phosphorus (P <sub>2</sub> O <sub>5</sub> )	1.80%
Potassium (K <sub>2</sub> O)	1.80%
C/N Ratio	10:1
Humic Acid	14.00%
Fulvic Acid	4.74%
pH (1:5)	5.17
Electrical Conductivity (E.C.)	< 10 mS/cm

## Transport Information:

Not classified as hazardous, ensuring safe handling during transportation.

## Storage:

Keep in a dry place away from direct sunlight.
