SUPPLY-SIDE KWH REDUCTION

proven **RESULTS**

Corrugated and paperboard industry businesses coast to coast are partnering with WPS Global to meet the challenges of an increasingly competitive marketplace and sustainability-minded operating environment. Just months after implementing a customized supply-side energy-saving solution, your business will realize thousands of dollars in energy savings – *and it requires zero effort or employee resources on your part.*

Save energy and money, everyday.

ENERGY MANAGEMENT

for the corrugated & paperboard industries

wpsglobal
SUPPLY-SIDE KWH REDUCTION

"I can't believe more corrugating facilities aren't doing this ... A facility can literally save thousands of dollars every year, get a return on their investment, and reduce carbon dioxide emissions by tons. It's a no-brainer."

--John L. president, WI-based sheet feeder

Serving corrugated, paperboard and packaging businesses, WPS Global is an energy management organization. Each system placed by WPS Global is unique in that it is custom-designed to directly reduce kilowatt consumption for the individual facility. By creating a facility-specific plan, selecting equipment and placing it based on the customer's particular needs, a WPS Global solution quickly translates to **significant and enduring electrical savings for at least 15 years.**

The equipment this industry operates are big consumers of energy. For financial and sustainability reasons, it's only natural for decision-makers to want to know how WPS Global will reduce energy consumption and make it more efficient. After reviewing WPS Global's energy-cutting plan, you'll be certain that there are significant reductions and savings to be had.

Ask WPS Global for real-world case studies from actual corrugated/paperboard customers.

10% REDUCTION GUARANTEE

an insurance policy for saving

After WPS Global conducts a comprehensive energy audit, presents a detailed plan and implements your customized supply-side energy-saving solution, within weeks you'll see a reduction in your energy usage and costs.

In fact, WPS Global offers a **10 percent reduction guarantee.** Combined with its flexible leasing options, your business is assured a prompt return on your investment. This promise, along with projected savings and real-world success stories, helps WPS Global articulate the generous opportunity for cutting a plant's operating costs.

"To survive, I feel we must be a low cost producer, and reducing our energy costs is one element of that strategy."

-- John B., President, NY-based sheet feeder

THE BOTTOM LINE: REDUCED ENERGY

lower bills and long term savings

Even with the most advanced, high efficiency equipment, you cannot realize optimal energy effectiveness or maximum savings. **You must control the supply side of the equation.** By implementing WPS Global's specific system for your facility, you can achieve savings of upwards of 20 percent. Your facility's efficiency will be greatly improved, thus significantly reducing the power being consumed by your facility.

What's in it for **YOUR** company?

up to **\$600,000** or more

In potential energy savings
over the lifetime of the system.
