

- Surface finish: Hot-dip galvanized
Standard: DIN EN ISO 1461
Average coating thickness: 85µm
- Surface clean, oil-free, with no visible distortion.
- Unless otherwise specified, dimensional tolerances follow standard GB/T 1804-V.
Hole position and diameter tolerance: ±1mm
- Material: S235\S355B.
- Complies with Israeli Standard 918 for deep galvanizing.
- Optimized design for high performance and efficient production.
