ABOUT US

Shanghai Elecnova Energy Storage Co.,Ltd is a hi-tech enterprise, focusing on integrated ESS solutions. Elecnova is capable to provide complete ESS package consisting of PACK, PCS, BMS and EMS.

Product as core, quality as cornerstone, Elecnova aims to meet the diversified energy requirements from all over the world. Elecnova is committed to providing customized ESS products and services for various scenarios such as power plant, power grid, commercial and industrial applications.

Corporate Vision

· Build Elecnova as a top expert in energy storage solutions

Enterprise Spirit

· Unity in a concerted effort
· Honesty
· Intelligence, innovation
· Scientific development

Core Values

· Create value for customers
· Share value with employees
· Contribute value to community

ESS Scenarios

Provide one-stop industrial and commercial distributed energy storage battery system solutions with high safety, high reliability, high efficiency and long cycle life.

All-in-one Air-cooled ESS Cabinet

ECO-E101WX

Brief

The all-in-one air-cooled ESS cabinet integrates long-life battery, efficient balancing BMS, high-performance PCS, active safety system, smart distribution and HVAC into one cabinet, enabling long-term operation with safety, stability and reliability. Through AC side parallel connection, it achieves agile deployment of ESS power station with flexible capacity expansion.

Features

Fast response
1P fast charge/discharge rate.

Energy Saving
Achieve utilization of new energy via energy storing & releasing of renewables.

Economical & Efficient
Conversion efficiency over 90%, DoD over 95%.

Self-developed
Self-developed PACK, PCS, BMS and EMS with good compatibility.

Smart O&M
Diversified access of monitoring by HMI (local), APP/web (remote).

Safe & Reliable
IP55, fully tested and optimized thermal management, cell difference ≤6°C.

All-in-one Liquid-cooled ESS Cabinet

ECO-E233LS

Brief

The all-in-one liquid-cooled ESS cabinet adopts advanced cabinet-level liquid cooling and temperature balancing strategy. The cell temperature difference is less than 3°C, which further improves the consistency of cell temperature and extends the battery life. The modular design makes the parallel solution more flexible and has higher energy density, which significantly improves the economy, safety and construction convenience of ESS projects.

Features

Compact
1.4m² footprint only, easy transportation & fast installation.

High Integration
233kWh energy in one cabinet with remarkable endurance.

Efficient Cooling
Optimal in-PACK duct design,
achieve high-efficient cooling and low energy consumption.

Long Cycle Life
Over 8,000 times cycle life, excellent performance of battery system.

Flexible Expansion
Modular design,
simplified parallel expansion.

Ultimate Safety
In-PACK fire warning and protection with NOVEC1230/aerosol, prevent heat diffusion and runaway.

All-in-one Air-cooled Hybrid Solar ESS Cabinet

ECO-E64WX

Brief

ECO-E64WX is a small capacity PV-plus ESS solution provided by Elecnova through its long-term accumulation in the field of ESS integration and digital monitoring technology. Adopting the all-in-one design concept, this PV-plus ESS cabinet highly integrates equipment such as lithium battery ESS, hybrid inverter, HVAC, FSS, BCQ, etc. The product has a more compact structure, easy installation, and flexible capacity expansion, supporting multiple operating modes such as self use, peak shaving, and backup power.

Features

Economical and Efficient
RTE over 87%, DOD over 95%.

Versatile
Support multiple brands of hybrid inverter, with higher selectivity.

Safe & Reliable
IP55, optimized ventilation design, temperature difference within 6℃.

PV pluggable
Support PV connection, with higher integration.

Compact & Convenient
0.96㎡ footprint, easy to transport and install.

Self-developed
PACK, BMS and EMS are all independently developed with good compatibility.

Expandable & Modular
Easy modular design supports parallel connection for convenient system expansion.

Easy O&M
Support multiple ways of operation and maintenance, including onsite, cloud.

Liquid-cooled Battery Container

ECO-B20FT3440LS-1

Brief

The 20-ft liquid-cooled ESS container product integrates PACK, EMS, BMS, HVAC, fire safety system into one container. Compared with the air cooling, the liquid cooling empowers the ESS product with higher power density and ensures the cell temperature difference less than 3°C, which effectively extends battery service life and improves energy efficiency. The 20-ft liquid-cooled ESS container product can be applied to power generation side, grid side, as well as C&I ESS scenarios which has strict requirements on power and capacity.

Features

Higher Energy Density

The 20-foot liquid-cooled energy storage container has a maximum capacity of 3.44MWh, providing higher energy density, and saving costs.

Lower Local Power Consumption

The variable-frequency compressor adjusts its operating status based on temperature conditions, thus reducing the equipment's power consumption.

Lower Operating Noise

The product significantly reduces the use of fans, resulting in lower noise compared to air-cooled products.

Longer Service Life

The cell temperature consistency extends the battery service life by 5% and enhances the safety of batteries, and increases returns.

Better Temperature Control

In comparison to air cooling, the liquid cooling scheme keeps cell temperature difference less than 3°C, which improves cell voltage consistency.

Higher Protection

The product utilizes the IP55 (PACK IP65) high protection level & C4 protection level and the high/low-temperature design.

The cell temperature consistency extends the battery service life by 5% and enhances the safety of batteries, and increases returns.

Better Temperature Control

In comparison to air cooling, the liquid cooling scheme keeps cell temperature difference less than 3°C, which improves cell voltage consistency.

Higher Protection

The product utilizes the IP55 (PACK IP65) high protection level & C4 protection level and the high/low-temperature design.

Specifications

PCS-Boost Container

ECO-H3200K

Brief

In order to meet the modular, integrated and convenient design needs of large-scale ESS stations, the all-in-one PCS-Boost container prefabricates the PCS, boost transformer, HV & LV power distribution unit, communication unit, etc. in one container, to achieve the fast construction of ESS stations. It has a virtual synchronization function and assures quality and stability for regional power distribution.

Features

Fast Delivery
Prefabrication & all-in-one design, high system integration, easy transportation and installation.

Ultra Bearing
Wide DC voltage range, Full load capacity at DC1500V.

Multi-level Protection
Supports charge/discharge management, and cooperates with EMS, BMS and other systems to achieve multi-level protection.

Swift Scheduling
Excellent functions such as fast power scheduling, off-grid operation and black start to improve energy efficiency.

Ultimate Safety
Whole-unit intelligent forced air cooling & high protection, adaptable to various harsh environments.

On-demand Customization
On-demand customization according to power and structural requirements to meet customized needs.

Specifications

Air-Cooled PACK

ECO-P1P20WS

Brief

The air-cooled PACK consists of LFP cells, grouping in 1P20S. With built-in BMU, HV connectors, fans, and fixed structural components, these accessories enable the PACK module to have protection functions such as overvoltage, undervoltage, overcurrent, insulation, short circuit, and overheat. Combined with PCS, it achieves energy charge and discharge. This PACK is compatible with 1500V platform.

Features

Excellent Performance
Laser welding for excellent cells consistency and superior charging/discharging performance.

Long Cycle Life
Over 8,000 times cycle life and a designed lifespan up to 10 years.

Safe and Reliable
Optimized ventilation system, active thermal management system.

Flexible Configuration
Standard & modular design, on-demand flexible expansion.

Specifications

Item	
Cell Type	LFP
Rated Capacity	280Ah
Grouping	1P20S
Rated Energy	17.92kWh (rated conditions)
Rated Voltage	64Vdc
Recommended Operating Voltage	56-72Vdc
Rated Charge/Discharge Rate	0.5C
Cooling	Air cooling
Cycle Life	≥8,000 times
Storage Environment	0~35℃, RH<75%(non-condensing)
Operating Temperature	-20℃~50℃ (discharging)/0~55℃(charging)
Ingress Rating	IP20
Dimensions (W*D*H)	470*950*230mm
Weight	143kg
Compliance	UN38.3, IEC62619, IEC63056

Liquid-Cooled PACK

ECO-P1P52LS

Brief

The liquid-cooled PACK consists of LFP cells, grouping in 1P52S. With built-in BMU, HV connectors, liquid cooling module, fixed structural components , these accessories enable the PACK module to have protection functions such as overvoltage, undervoltage, overcurrent, insulation, short circuit, and overheat. Working together with PCS, it enables charge/discharge operation.

Features

Excellent Performance
Laser welding for excellent cells consistency and superior charging/discharging performance.

High Integration
High energy density,
built-in BMU monitoring the cell status in real-time.

Safe and reliable
The cells temperature difference less than 3°C.

Flexible Configuration
Standard & modular design,
on-demand flexible expansion.

Long Cycle Life
Over 8,000 times cycle life and a designed lifespan up to 10 years.

Advanced Protection
IP65 protection level,
meeting various scenarios.

Battery Management System

ECO-BMS

Brief

BMS supports two architectures: three-level architecture (BMU+BCU+BAU) and two-level architecture (BMU+BCU). BMU, BCU and BAU respectively offer PACK-level, cluster-level and array-level protection against overcharging, over-discharging, overcurrent, overheat and short circuit for battery clusters. Real-time monitoring of battery safety status, fault diagnosis, and warnings are provided. The main control unit within the cluster can accurately estimate SOC/SOH (State of Charge/State of Health) and offers insulation detection function with precision requirements exceeding national standards, ensuring efficient, reliable and safe operation of the energy storage system.

Features

Complete Architecture
Compatible with two-/three-level architectures, support distributed and centralized scenarios.

High-Precision Insulation Estimation
Flexible insulation diagnosis solution, compatible with two-/three-level architectures with high accuracy.

Multiple Interfaces
Multiple types of DI/DO interfaces, adaptive to status input and control of various equipment.

Various Applications
Supports air-/liquid-cooled scenarios.

Protocol Compatible
Support multiple PCS protocols.

SOC Estimation Accuracy
Error < 5%

Ultra-Low Consumption
Flexible power supply and hibernation function.

Real-Time Response
100ms sampling interval to ensure timeliness of data.

Power Conversion System

ECO-PCS

Brief

This product is a modular inverter specifically designed for small-scale ESS. It achieves bidirectional energy conversion in ESS and meets the requirements of various scenarios such as C&I ESS, microgrid energy storage, PV-plus ESS.

Features

Ultra-High Efficiency
GEN7 IGBT, three-level topology and minimal switch loss modulation method, conversion efficiency reaches up to 99%.

Flexible Configuration
Modular design enables parallel expansion, can directly connect to LV distribution.

Reliable
IP65 protection level, ms-level on-/off-grid switching.

Versatile Applications
Extra-wide DC voltage input range, suitable for various battery types and scenarios.

Unique Design
Adapt to single-/three-phase loads, active/reactive power control capabilities

Excellent load-bearing
100% three-phase unbalanced loads, strong resistance to load fluctuations.

Energy Storage Management System

ECO-EMS

Brief

The ECO-EMS series products are integrated EMS designed for ESS scenarios, enabling real-time monitoring to meet the requirements of comprehensive operation monitoring, ensuring the safe, reliable, and cost-effective operation of ESS. Adopting an integrated architecture design, the system is suitable for user-side ESS, microgrid and PV-plus ESS and more. It ensures that the system operates optimally at all times, maximizing overall benefits and shortening ROI.

Features

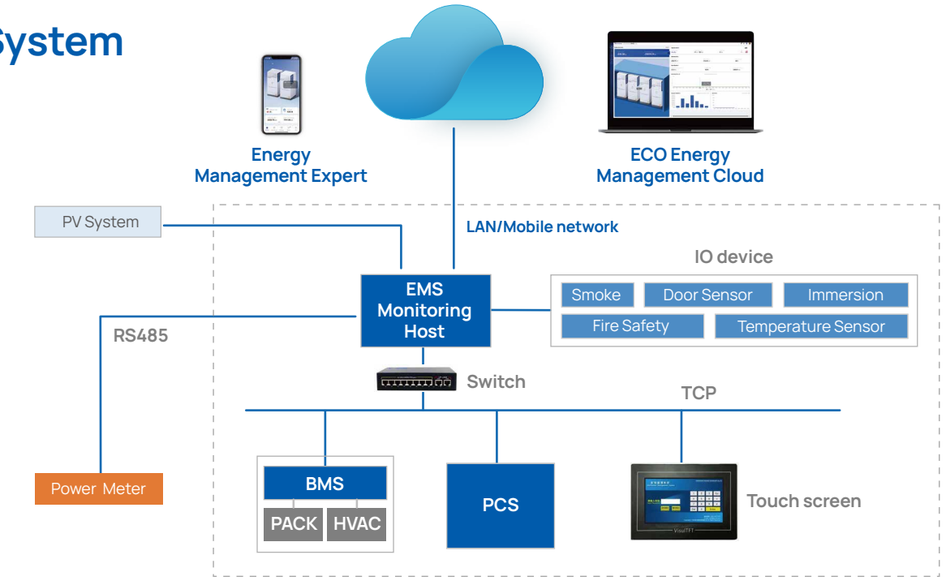
Smart O&M
Support 4G network access to achieve intelligent O&M both on site and cloud.

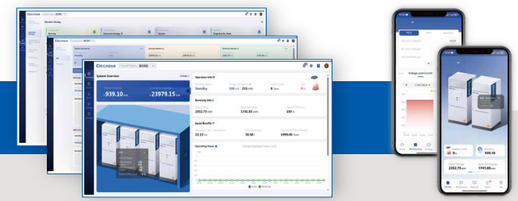
Stable and Reliable
Bus monitoring and bus wake-up, support the parallel operation of up to 10 integrated units, auto-networking, mutual backup operation between APP and nodes.

Diverse Integration
Support real-time power control, load tracking, demand management, and charge/discharge planning strategies, integrate with distributed power generation equipment, support coordination control of PV-ESS, and distributed consumption and other operation modes.

Self-adaptive Operation
Flexible arrangement of single-/dual-bus during parallel operation, identify the bus operation mode to achieve adaptive operation of multiple units, ensuring the safety of line operation.

System





Functions

System Monitoring
Real-time monitoring of the operating status of PCS, BMS, air conditioning, access control, fire protection equipment, smoke sensors, immersion sensors, temperature and humidity sensors, and other devices.

Peak Shaving
Adapt charge and discharge strategies to achieve energy arbitrage.

Time Shifting
Intelligent prediction of new energy generation, maximizing the self-consumption utilisation of PV and reducing customer electricity costs.

SOH Analysis
Collect data such as cell voltage, total current, SOC, and accurately assesses the battery's health status based on cloud.

Intelligent Alarms
Various notification methods, help customers quickly address operational abnormalities and ensure reliable system operation.

Demand Management
Smooth the electricity load through charge and discharge strategies, reduce peak power & maximum demand, and lower the customer's electricity cost.

Remote O&M
Remote fault diagnosis and maintenance, reducing equipment downtime and safety risks, improving operation efficiency, and reducing maintenance costs, ensuring system stability.

PV-ESS Coordination
Accurately predict electricity loads and intelligently control the output of PV generation and ESS, improving power supply reliability.
