

Countdown to the Green New Deal and all-out Tyranny!

*In memory of Professor David Bellamy
A real green and a real scientist! A man of complete integrity unlike Extinction Rebellion.*

REAL GREENS AND ECOLOGISTS ARE NOW COMING TOGETHER TO EXPOSE THE SCAM OF THE CENTURY!

**THE PRIVATE CRIMINAL CENTRAL BANKERS SUPPORT THIS
EXTINCTION REBELLION 'SAVE THE EARTH' DEATH CULT.**

Enough is enough! These corporate-backed Fake Greens have got to be stopped! CO₂ is the Gas of Life and the Earth needs more not less! The appalling criminal mind-set that's behind the current 'Climate Change' hysteria is now exposed for all to see! UN Agenda 2030 and the Green New Deal must both be stopped. Real Ecology and Real Science must prevail!

The sad fact is that the originators of *Extinction Rebellion* are knowingly carrying out the wishes of the secretive and criminal debt-creating central bankers. It is all about forcing the human race to accept a totalitarian future of total control over all of us.

This Orwellian future needs the roll-out of 5G—the extremely dangerous and deadly microwave wireless technology for the 'Internet of Things' that kills birds and insects and which results in healthy trees being cut down because the 5G signal cannot penetrate through wet leaves. It is also extremely harmful, if not deadly, to many human-beings. The fake-green leadership of *Extinction Rebellion* refuses point blank to campaign against this appalling, invasive and harmful technology. Why? Because it is totally complicit with the criminals who are the real destroyers of our planet's eco-systems!

Accusing people who disagree with them of being "Climate Deniers!" is shutting down the actual scientific debate into climate change. This is just full-blown FASCISM! You should never shut down free speech and the exchange of ideas... but *Extinction Rebellion* does!

Frightening children that the world is going to end in nine years is not only unforgivable but it is actually child abuse! *Extinction Rebellion* should be utterly ashamed of itself.

However, that said, the ordinary people, especially the young, who are turning out onto the streets to support this movement are overwhelmingly good people who are genuinely concerned about the ecological destruction being done to the Earth's ecosystems. We do need to plant a trillion trees; we do need to stabilise and then considerably increase the Earth's biodiversity; we do need to get the plastic rubbish out of our oceans; and we do need to ensure that the world's ecosystems, which we all depend upon for our health, happiness and prosperity, are ecologically managed in a sound and common-sense way for the good and well-being of all living creatures... including us, the human race.

But what we don't want is lies, which is all we're getting from *Extinction Rebellion*.

SO, LET'S SIMPLY APPLY SOME GOOD OLD COMMON SENSE, THE PROVEN TRUTH AND REAL SCIENCE!

Yes, climate change is real! It's been happening for millions of years—just ask any geo-archaeologist. And yes, we must mitigate against the worst effects by investing in proper flood and sea defences. But it is not man-made. Let's look at the actual science:

FACT: The percentage of total CO₂ in the Earth's atmosphere is 0.039%.

FACT: The percentage of man-made CO₂ is around 4% of 0.039%.

FACT: CO₂ is not a driver but a follower of temperature increases—the real driver of climate change is, of course, the Sun.

FACT: CO₂ is the food for plants that give us oxygen—we need more, not less!

FACT: The UN Inter-Governmental Panel on Climate Change (IPCC) is a political body and not a scientific body that's been bought and paid for by the criminal central bankers.

FACT: Tens of thousands of Real Scientists have signed petitions to try and stop this "Bad Science" as the late Professor David Bellamy used to call it. It's all madness for a reason!

Look at these pictures of *Extinction Rebellion* in action—these images are those of a sick death cult!

This movement is a well-funded & corporate-backed 'change agent' to destroy the very well-being and fabric of our country and to take us all down a well-planned path towards Green Fascism and a full-blown Orwellian future. The Green New Deal means goodbye to wood-burning stoves; farewell to British Farming and Fishing as we are all told to become vegans, eating fruit and vegetables which have been manufactured in hydroponic factory units; and no more flying to take holidays abroad. Come on people, WAKE UP to what's really going on! Please go to www.newchartistmovement.org.uk to get the real truth!
