ROMANY
LANDSCAPE & DESIGN

ABOUT US

At Romany Landscape LLC, we create customized landscaping solutions to enhance the aesthetic appeal and value of your property. Our team of experienced designers and installers provides a range of services, from initial design to ongoing maintenance. We work closely with you to bring your unique vision to life, selecting the perfect plants and elements to create a serene and tranquil environment. Our services aren't limited to just villas - we also design and install landscapes for commercial properties and public places.

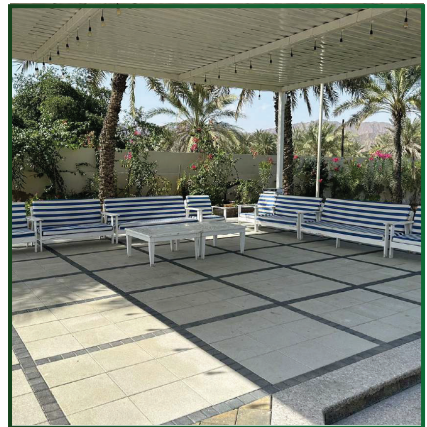

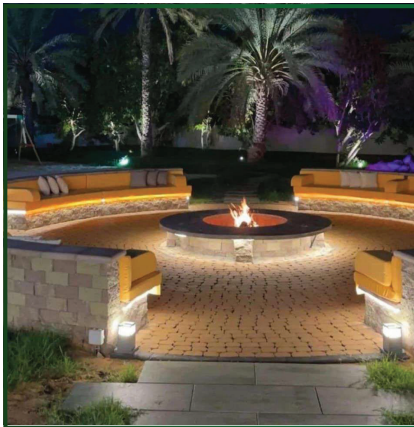

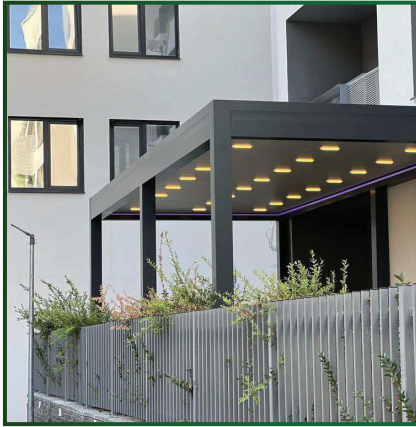

VISION

Romany Landscape & Design LLC is a landscape design and maintenance firm established in the United Arab Emirates. We offer a variety of services to residential and commercial clients, including landscape design, installation, and upkeep. Our vision is to exceed our client's expectations by creating outdoor environments they will love and use for many years to come.

DESIGNS

We are committed to developing beautiful, practical, and sustainable landscapes for our clients in the UAE at Romany Landscape & Design LLC. Our professional landscape designers mix creativity and expertise to develop designs that are tailored to each client's individual demands and tastes.

INSTALLATIONS

The process of setting up and configuring various equipment and systems used in landscape design and maintenance is referred to as technical installation. This can include irrigation systems, lighting systems, and other technical elements that contribute to a landscape's overall appearance and functionality.

SWIMMING POOLS & FOUNTAINS

At Romany Landscape LLC, we provide a variety of services to assist our clients in creating the ideal outdoor living environment. Swimming pool and fountain design and installation for landscapes is one of our specialties.

LIGHTING

We recognize the importance of lighting in creating a beautiful and practical outdoor space at Romany Landscape LLC. Proper lighting not only improves a landscape's aesthetic appeal, but it also serves utilitarian objectives such as safety and security.

SOFT SCAPE & IRRIGATION SYSTEM

Irrigation systems are essential for constructing and maintaining beautiful and healthy villa landscapes. Plants, trees, and turf offer beauty to the outdoor spaces while also providing shade, which can help lessen the heat inside the villa.

OUTDOOR BBQ KITCHEN

For a variety of reasons, an outdoor BBQ kitchen can be a valuable addition to a villa. Entertaining guests and throwing parties can be made easier with an outside BBQ kitchen.

PERGOLAS

Pergolas are an important part of landscape design because they provide shade and protection from the sun. They can be utilized to make an outdoor seating area or to cover a parking lot.

KID'S PLAY AREA

Our Romany Landscape Company's proposed kid's play area for your home will be a safe and entertaining spot for children to play and enjoy the outdoors. The play area will be age-appropriate, with a range of equipment and games to keep youngsters entertained.

BIOCLIMATIC PERGOLA

Bioclimatic pergolas are the most recent technological breakthroughs, and they are sturdy, durable, easy to operate, climate-controlled, flame-retardant, and easily retractable. They can be fitted or installed anywhere and are appropriate for any home or workplace.
