## PRIMARY 4

Student's Book  
Term 2

Paul Drury and  
Nicola Gardner

## Foreword

The MOETE launched Egypt's reform vision for the development of education, and the process of developing curricula comes at the heart of this vision. The implementation of this vision was heralded in 2018, starting with the kindergarten stage in its first and second grades, with the aim of continuing until the end of the secondary stage.

This vision endeavored to make major transformations in the teaching and learning processes, where there is a transition from acquiring knowledge to producing it, and from learning skills to employing them both in specific learning situations and in the general life of the learner outside the classroom. Our curricula also integrate values that contribute to the establishment of our society—values which pose as a protective fort for our homeland. Egypt's reform vision for curriculum development also aims to take into account the specifications of pre-university education graduates, as well as the challenges Egypt faces locally, regionally, and globally. The developed curricula are intended to foster a citizen who is capable of engaging in civilized conversations and positive dialogues with the other, in addition to acquiring digital citizenship skills.

In this regard, the MOETE extends its gratitude and appreciation to the Central Administration of Curriculum Development. It also extends its thanks and gratitude to Longman Egypt and York Press for their active participation in the preparation of this book. Gratefulness also goes to all the Ministry's experts who contributed to the enrichment of this work.

This transformation of Egypt's educational system would not have been possible without the significant support of Egypt's current president, His Excellency President Abdel Fattah el-Sisi. Overhauling the educational system is part of the President's vision of "rebuilding the Egyptian citizen" and it is closely coordinated with the Ministries of Higher Education and Scientific Research, Culture, and Youth and Sports. The new educational system is only a part in a bigger national effort to propel Egypt to the ranks of developed countries, and to ensure a great future for all of its citizens.

## Words from the Minister of Education and Technical Education

### Dear students and fellow teachers,

It gives me great pleasure to celebrate this crucial stage of comprehensive and sustainable development, an epic in which all Egyptian people are taking part. This pivotal stage necessitates paving a foundation for a strong educational system which yields a generation that is not only capable of facing the major challenges the world is witnessing today, but one that also has complete possession of the skills of the future. For this reason, the Egyptian state is keen on empowering its citizens by establishing a top-notch educational system that invests in its children the expertise required to get them to compete at both a regional and global level, at a time when the world is witnessing successive industrial revolutions.

This dictates that our educational system has at its core an emphasis on skills development, deep understanding, and knowledge production. This can only be done through modern curricula that keep up with the changes taking place globally-- curricula which prioritize the development of skills and values, and the integration of knowledge. They are also curricula that focus on the provision of multiple learning sources, and integration of technology to enrich the educational process and to improve its outcomes, while addressing the most important contemporary issues.

To achieve this, we must all join hands to continue to revolutionize our education, and to support it with all that is required to transform it into a globally pioneering educational system.

My warmest regards to you, dear students, and my deepest gratitude to my fellow teachers.

**LESSON 1**  
**GAMES AROUND THE WORLD****1 Look at the pictures. Do you know how to play these games? Read and check****Party Games**

When we get together with our family and friends to celebrate something like a birthday or a wedding, the children often **play games**. Here are some **traditional** games people play around the world.

**Pass the parcel**

We all love to **give presents**. It's even more fun to **open presents**.

**How to play:**

**Wrap** a small present and cover it in lots and lots... and lots of paper.

The players sit in a circle.

**Play some music.**

Players give the present to the next person as the music plays. When the music stops, the player holding the present takes off one piece of paper. The player who **unwraps** the present keeps it.

**Musical chairs**

Run but be ready to sit!

**How to play:**

Put out some chairs. If you have 6 players, you only need 5 chairs.

**Play some music.**

Players run around the chairs.

When the music stops, everyone sits down. The player without the chair is 'out'.

**Take away** one chair and play again.

**Hide and seek**

This is a very old and popular game. Many players can join in this exciting game. All you need is a wide place to play it.

**How to play:**

One player, called the **seeker**, closes his or her eyes and counts to ten. The other players hide. The seeker tries to find them. The first player the seeker finds becomes the next seeker. The last one left is the winner.

More than half of Egyptians are under the age of 30. This means we are full of energy. We are helpful to each other and we are very friendly to visitors. We are very **hospitable** people.

# AIR POLLUTION

## 1 Look and discuss. Why is this boy wearing a mask?

## 2 Read the text. Why is air pollution dangerous?

Cities have many cars. Cars make air pollution. They put **chemicals** into the air. We can't always see the chemicals, but they are dangerous.

Air pollution is very dangerous for us. When we breathe the polluted air, we cough and feel sick.

Does this happen to you in your city or town? Is the air dirty or clean?

Some cities are trying to stop the air pollution. In London, England, parents do not drive children to school. The children walk or cycle to school. Cars do not go near the school.

In Shenzhen, China, they have electric buses. These buses do not make air pollution.

In Gharbia, Egypt, farmers wanted to have cleaner air. To do that, they stopped burning rice straw. They used the straw to make food for their animals and cover their crops.

In Paris, France, cars can't go into some parts of the city. In these places, you can only walk or take a bus.

In Copenhagen, Denmark, there are more bikes than people and large parts of the city don't allow cars.

These are all good ideas to stop air pollution in cities. Which idea do you like best?

### 3 Match the cities with the project

- |              |                                         |

| 5 Gharbia    | e No cars near schools                  |

### 4 Listen to the expert talking about air pollution. Why is she worried?

**1 Read Youssef's report. Why is he excited?**

Last week I heard Dr Helen Walker talking about air pollution. I liked her ideas and I did some research. I talked to my family about what we can do:

- We can have **energy-saving lightbulbs** in our apartment.
- We can use buses and trains more.
- We can share a car with a friend sometimes.
- We can walk and not always go by car.
- We can have many plants on our balcony.

We decided to change some things as a family. Dad now goes to work with his friend in the same car. Mom takes the bus to work. She doesn't drive. I now go to school by bike. My sister, Noura, walks to her school.

We have more plants in the living room and on the balcony. When our lightbulbs stop working, we can put in energy-saving lightbulbs. I'm excited!

# **DALIA SAVES THE VILLAGE!**

**BY NICOLA GARDNER**

# PICTURE DICTIONARY

maize

Dalia lives in a **village** in Egypt. One evening she is doing her homework on her computer. She is doing research about crops in Egypt, like wheat, maize, and rice, and it is very interesting. Wheat is an important crop in our country and we use it to make bread. Dalia looks at the pictures of delicious Egyptian bread. Dalia likes *baladi* bread best. Which is your favorite?

Dalia's mom, Gameela, is speaking to Dalia's dad, Waleed, who looks sad. "The crops are not growing well in the village. There is a problem with the water and we have no **irrigation**," says Gameela to Dalia. "We need to help everyone in the village with their crops." Dalia's brother, Tarek, says, "But what can we do?" Dalia says, "It's very simple. Let's call everyone in the village on **social media**. We need to help our village."

Dalia's family gets water from the Nile. But the irrigation canal is not working. She tells everyone in the village about this problem on social media, then meets everyone in the **main square**. A lot of villagers say they can help.

The next day everyone gets together in the center of the village. Some people come on foot, and some by bike. Some people come by boat or by car from another village to help. Everyone is very excited to help with the problem. They meet at Dalia's grandparents' house. Dalia's grandma gives them tea and cookies.

Dalia and her family go to see the problem. The irrigation canal that brings the water is **blocked** with trash – plastic bottles and **household** things. There are also some plants in the water. Tarek says, “We need to start work and clean the water.” The water is not very deep and they start to clear the trash. They fill 20 trash bags with the trash. Now the water isn’t polluted.

The water comes back to the village and the crops grow again. Everyone is very happy. They can grow food on their land and they can sell their fruit and vegetables to buy other things. Their lives become easier. But some of the crops are not very good.

Dalia has a **plan**. She thinks the villagers can produce more food. She says they should try wheat – she tells them about her research. She says wheat grows very well in Egypt and is great for making delicious bread and cakes.

Some villagers like the idea – they start to grow wheat in some of their fields.

From the wheat they can make flour. From the flour they can make delicious Egyptian bread. Grandma can make more of her **awesome** cookies. The villagers make bread and cookies to sell to other villages.

In a few years, everything is better in the village. Dalia walks around the village and sees the changes. She is very proud. When she grows up, she works with **agriculture** to help other people with their crops.
