

# CorelDRAW Plug-in instructions

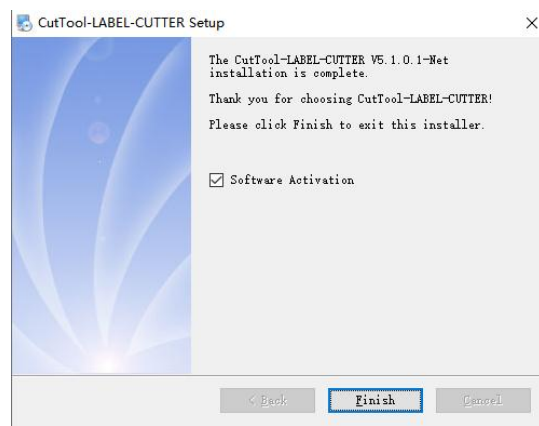

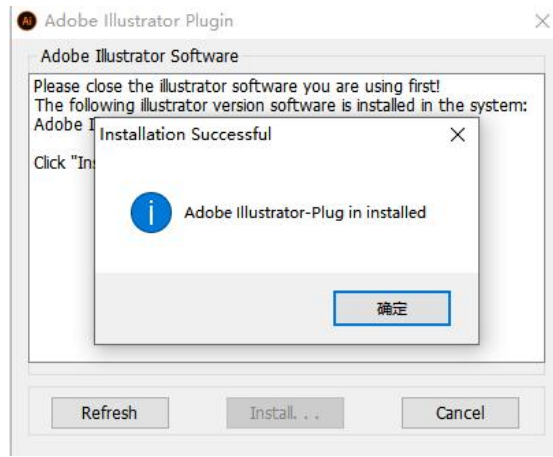

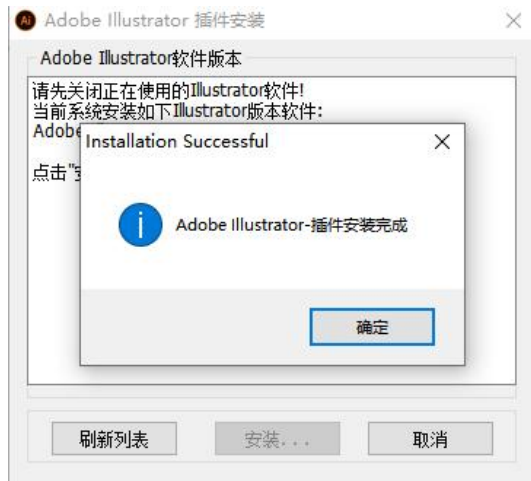

## 1, CDRCDR Plug-in installation

double-click

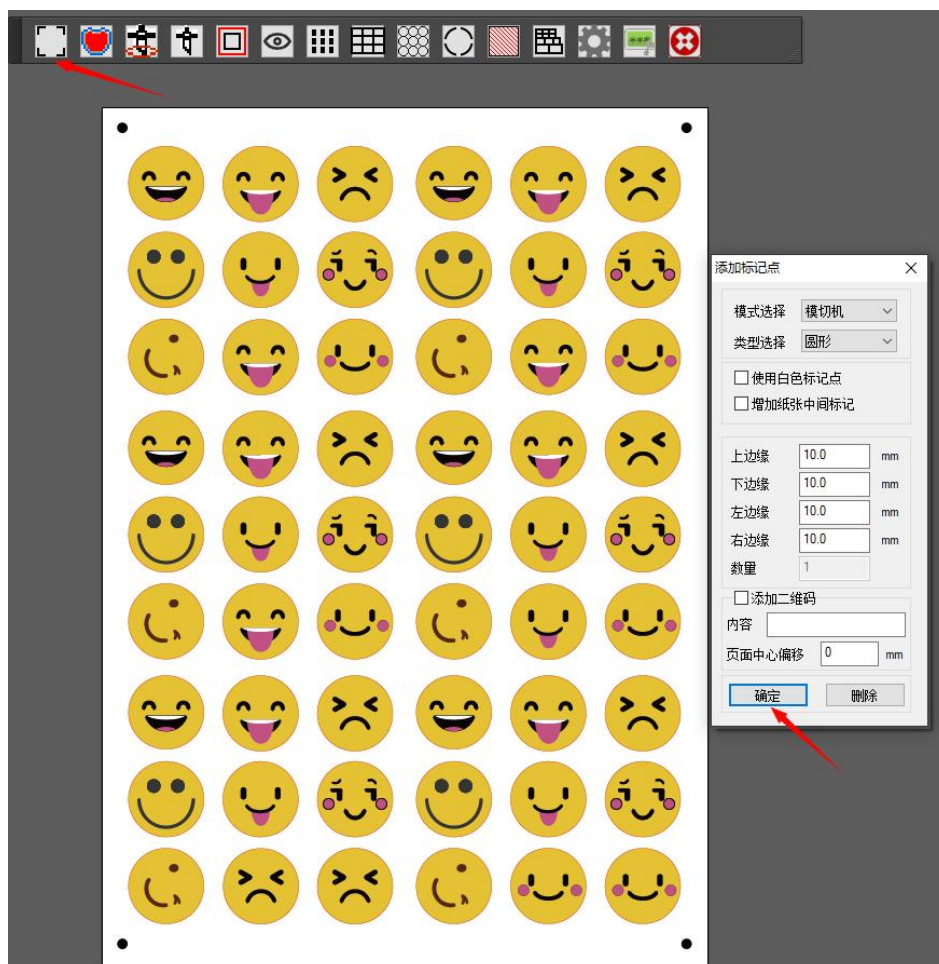

finish.

## 2. Adobe Illustrator Operation

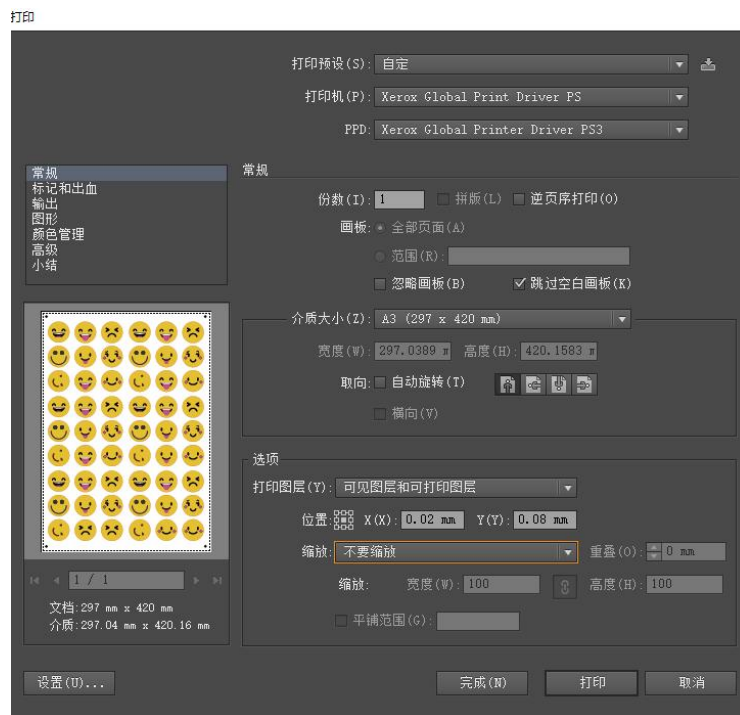

2.1 Click "Window", select the plug-in, see the corresponding column;

2.2 Click Install plugin to add marks and typeset in red;

3.3 The die cutting pattern (including positioning mark) is printed 1: 1, and the die tangent line is not printed

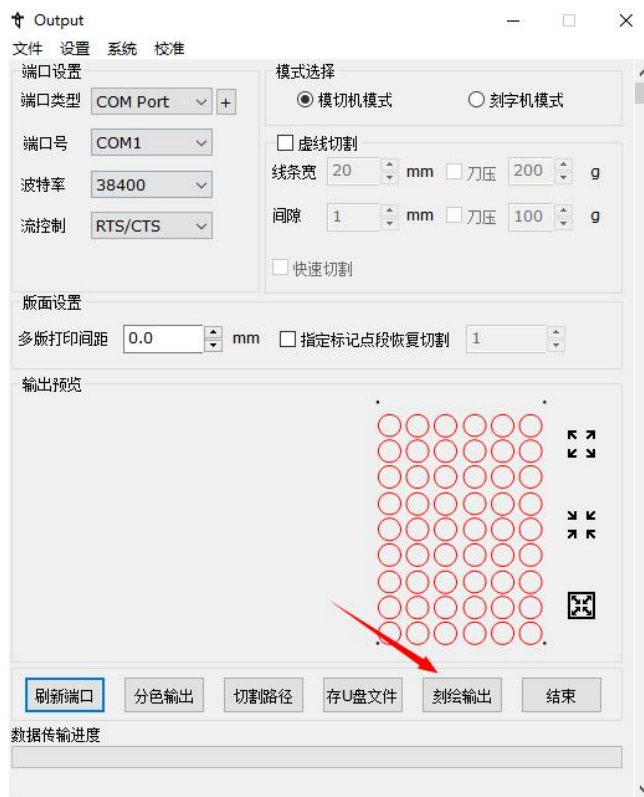

Note: The outline and preview box invisible layers do not need to be printed

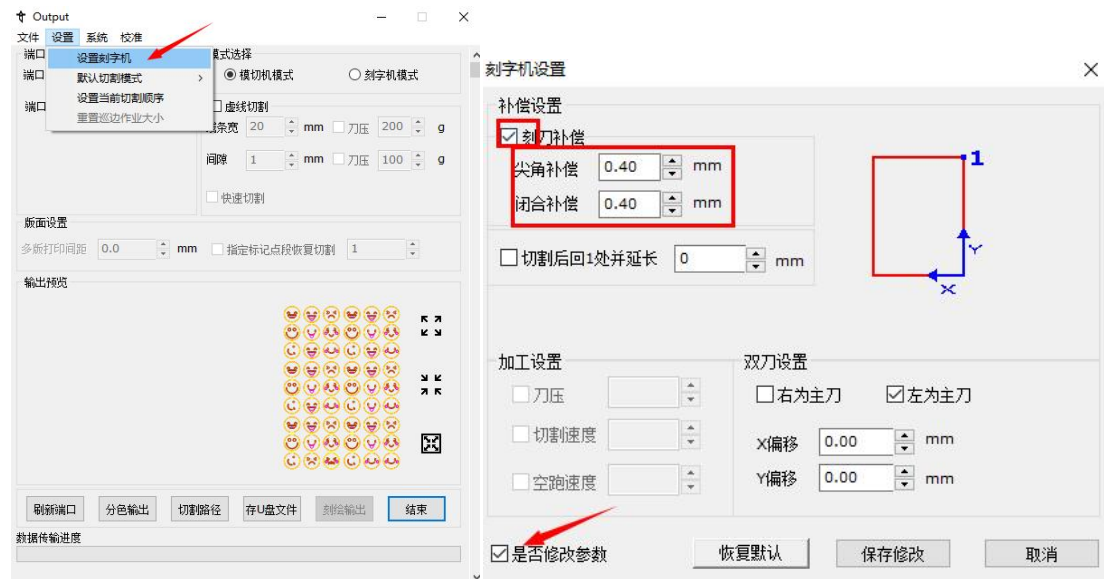

3.4 Put the printed material on the paper feeder of the machine, select the die tangent line and click the Send button as shown below:

Pop-up dialog box click "engraving output" or "Save USB flash drive file" to work with USB flash drive.

### 3.5 Compensation setting

### 3.6 How to extract contours
