

SMRA

Sudanese Medical Research Association

About

It is a specialized medical scientific association in the field of medical research and medical education, includes all medical specialties (medicine, dentistry, pharmacy, medical laboratories, nursing, and medical equipment engineering), designed to inculcate the values of scientific research and encourage students and young doctors to conduct and publish their own researches.

Vision

- A society rich in culture of medical researchers consisting of youth cadres who will be qualified and trained in the field of medical.
- A generation of students with scientific research papers that conform to the international standards to be published in international magazines.
- Upgrading and developing methods for preparation and publication of medical research on the local and global level.

Objectives

- Developing the culture of scientific research in Sudan.
- Introduction to job skills and dissemination of scientific research.
- Providing doctors with the scientific and practical experience.
- Viewing the latest and most advanced worldwide trials in various medical fields.
- Exploring researchers work and its role in society.
- Introduction to the history of medical research and the means to improve it.
- Working on communication with scientific journals that publish researches.

Scientific Committee

It is a committee of doctors and specialists in the field of medical research. It consists of professors and doctors that are highly experienced in the field.

They oversee all the work of the association and provide advice to the Executive Committee of the association.

Framework

1. Office of Presidency:

- President.
- Vice president.
- VPE.

2. Secretariat Office.

3. Medical Research Office:

- Managing research work and projects in the association.
- Supervising data collection.
- Regulation and supervision of field survey of the area where we choose to search.

4. Training and Rehabilitation Office:

- Supervision of training workshops for particular medical areas.
- Research methodology workshops.
- SPSS workshops.

5. Media and Publication Office.

6. The Financial Office.

7. Data Analysis Office:

- Data analysis.
- Membership of the association.

8. Office of External Affairs:

- Activate research exchange program for students.
- Connect the assembly of associations of medical research with research centers inside and outside Sudan.

9. Conferences and Events Director (CED):

- Supervision and regulation of conferences and events and other activities in the field of medical research and medical education.

The Association Projects

From Association:

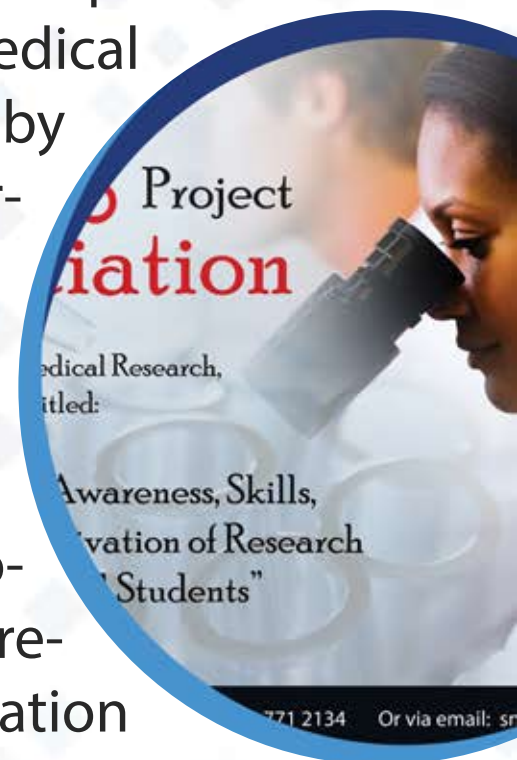

A number of research topics are proposed by our scientific committee that are important in the development of all medical areas in Sudan. These are done by the association under the supervision of the scientific committee.

From outside:

Research topics which are proposed by research centers and research associations as a collaboration with SMRA.

From Students:

We open our door for students from various medical fields whom have a number of creative ideas and topics that appeal to our vision and goals. We contribute with them in order to give them the chance to make their

researches and offer them what they need. For example we help them in:

- Proposal writing.
- Questionnaires.
- Data collection.
- Data analysis.

**So be like the stem cell.
Differentiate yourself from others.**

We Have a Proposal Meeting Session:

Which is done under the supervision of a member of the Scientific Committee for each research contributed by the association for the benefit of all students and members too.

Journal Club:

A Committee composed of professors, doctors and students who join together to:

- Evaluate the scientific papers and recent thesis.
- Review specific problems in the sudanese

- health system.
- Review scientific papers published globally in order to improve the problems mentioned above.
 - These papers are presented for audition in order to ensure comprehensive implementation and useful recommendations regarding the issue.

The Benefits of Journal Club:

- Filling the gap between published evidence and clinical practice in Sudan.
- Improving the knowledge and skills of the critical appraisal among journal club participants.

We've Collaborated With a Lot of Other Research Organizations and Associations In Sudan, Like:

- Daoud Research Group.
- Salah Wansi Organization.
- Tayba Center for Cancer Researches.
- Soba Research Center.
- National Center for Research.

EVENTS

Cancer Event: Research papers presented: 6 papers.

Neurology Event: Research papers presented: 12 papers.

Cardiology Event: Research papers presented: 8 papers.

World Heart Day Marsh
