

# Computer Networks : Sending an Email

## Networking for Kids: How Does the Internet Really Work?

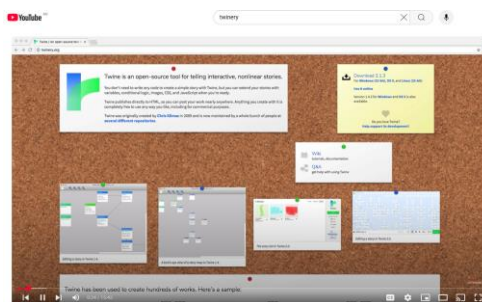

Home network diagram with Modem and Router

This is a pretty basic network layout, but as you can see in the network diagram, we have added our own router. If you have a fibre connection for example, you only get a modem from your ISP. The modem can only setup the internet connection and delivery it to one network device..

Create a Twinery to illustrate the process of sending and receiving an email

Here's a prompt:

John wants to send an email to his friend David.

He starts by turning on his laptop, opens up his email account and typing an email.....
