

2024

Baseline Emissions
North West Vending

Scope 1

Scope one emissions come directly from your business. They include emissions from fuel combustion in furnaces and vehicles, as well as emissions from chemical production.

**Total metric tons
of CO₂e 0.6**

Scope 2

Scope two emissions come indirectly from the consumption of purchased energy from utility sources that your business doesn't own. This includes electricity, heating and cooling. This includes any emissions from fuels burnt on-site for operations; the use of refrigerants, gases and certain chemicals in business processes; mileage in fleet vehicles; and work related travel in employee-owned vehicles.

**Total metric tons
of CO₂e 17.0**

Scope 3

Scope three emissions are all indirect emissions not covered by scope two. This includes anything linked to your commercial activity that isn't owned or controlled by you, including your entire supply chain, travel, waste, purchased goods, assets and investments. It also includes how consumers use your products and services.

**Total metric tons
of CO₂e 1558.6**

2024 Highlights:

"In 2023 an ambitious target reduction of 50% in Scope 1 emissions was set, this led to an £88k Investment in two Solar farms in our site buildings with a total generating capacity of 136 kW, the target has been met"

Scope 1

Replacing R134a with R290 refrigerant gas where possible when recycling pre-owned vending equipment saving 700Kg of CO2 emissions.

Scope 2

2024 saw the Introduction of Solar Panels on our buildings, energy costs were reduced by 52%. In 2025 our target will be a more modest 10%.

Scope 3

2025 our target will be a reduction of 10% and will see focus on easy wins to reduce our carbon footprint, we hope to achieve this by gradually replacing the diesel fleet with electric, using green power generated from our own site.

Paper

As deployment of our new operations platform continues there is less reliance on paper and greater use of electronic devices. Our electronic catalogues will see the phasing out of paper catalogues.

Cardboard

With greater control of logistics we are specifying recycled packaging and recycled cardboard be used for products.
