Gusto 8 Lift

The Gusto 8 Lift is part of a new generation snacks and cold drinks vending machines from Evoca, engineered for maximum flexibility, premium product care, and high energy efficiency. This Gusto 8 Lift delivers a superior user experience through its advanced lift delivery system, multi temperature management, and sustainability focused construction.

Say goodbye to cans of carbonated drinks spraying all over your clothes because it was dropped off the shelf during the dispense process. The Gusto 8 Lift uses a soft cradle that glides to your product and gently brings it back to the dispense area, reducing fizz and product damage. As with the rest of the Evoca range, the Gusto 8 Lift has the option of ETL, or Electronic Tray Labelling. It does away with old fashioned printed labels and introduces a liquid crystal display screen (LCD) that spans each shelf. The display can show prices and as well as display a line of text messages, useful for short form marketing.

The Gusto 8 Lift is one of the most eco-friendly vending machines available, with up to 60 percent of its components being recyclable at the end of its life. Impressive power consumption of 1056 kWh per annum scored as Class C in the new IECEN 63252 compliance rating.

Perfect for workplaces, hospitals, colleges, leisure centres, transport hubs, and any high traffic environment needing reliable, modern vending.

Features and Benefits

- Lift system prevents product damage
- Multi temperature vending (food, snacks, drinks)
- Energy Class C with R290 refrigerant
- Touchless payment compatibility
- Fully adjustable trays (V Flex)
- LED lighting for premium product display
