

Gaggia G100 ES

Meet the G100, the new fully-automatic coffee machine from Gaggia that's been created to stand out in even the most refined locations which – with its exceptional handling and practicality of use – is capable of making its mark in any environment.

The high level of customisation incumbent in Gaggia facilitates a comprehensive menu and allows operators to create excellent drinks, based on the individual preferences of consumers. Furthermore, the dispensing area can easily host large glasses of up to 12 oz. Gaggia also features a movable cup holder, which is easy to remove and clean and allows you to adjust the height to obtain the best possible in-cup quality.

Thanks to its user-friendly energy saving function, Gaggia automatically enters "eco mode", so not only can you set the coffee boiler temperature, but you can also enable or disable the LEDS to set the brightness level of the display. In this way, both energy consumption and operating costs are significantly reduced.

- User interface 7-inch Touchscreen
- Number selection Up to 8 selections per each page
- Number canisters 2
- Number mixing bowls 1
