MICROCEMENT

Color chart

Coatings with Petrous beauty

Natural collection TRADITIONAL

Ultra fine grain size characterized by its marked stucco effect and use only as a finish.

De granulometría ultra fina que se caracteriza por su marcado efecto estucado y uso únicamente como acabado.

Cemher microcement is a decorative coating with the appearance of natural stone. A material capable of transmitting incomparable sensations thanks to its versatility that enhances the aesthetics of floors and walls, both indoors and outdoors, in a myriad of environments to which it provides naturalness, elegance and exclusivity.

Our years of experience manufacturing microcement has allowed us to create specific products to provide the best solution for each room or architectural difficulty.

El microcemento Cemher es un revestimiento decorativo con apariencia de piedra natural. Un material capaz de transmitir sensaciones incomparables gracias a su versatilidad que ensalza la estética de suelos y paredes, tanto para interior como para exterior, en un sinfín de ambientes a los que provee de naturalidad, elegancia y exclusividad.

Nuestros años de experiencia fabricando microcemento nos ha permitido ir creando productos específicos para dar la mejor solución en cada estancia o dificultad arquitectónica.
