

Creating Device Groups

Device groups allow manager/ admins to delegate a set amount of devices into a group which then can be assigned to a user. This way users only have access to certain systems instead of all of them.

To create Device groups on your farm in Harvest-Watch you must be logged into a account with account Admin privileges.

Once you are logged in click on the blue text on the left side of the screen labeled “Device Groups”.

Once you click on it, a new screen will pop up.

Here you can see currently setup device groups.

To create a new device group click on the gree add group.

Enabled Only? ☒

Page Size: 20

[Id](#) [Name](#)

No Groups Found

Once you click on the button a new screen should appear.

On this screen you can name the group and select its associated devices and users.

Now click save and exit on the top left and you have successfully created a device group.
