

The Premium Choice for your WMS Needs

A professionally managed services provider can give you the decisive edge to:

- **Unified Global Design:** Tailored for diverse DC operations, seamlessly blending retail and eCommerce with future-ready automation flexibility.
- **MHE Integration:** Comprehensive solutions for both automated and non-automated DCs.
- **ProActive Development:** Enhance and customize Active products efficiently, leveraging MA framework cost-effectively.
- **Templatized Rapid Rollout:** Deploy modules with flexible On-Off capabilities for each DC.
- **Configuration Management:** Seamlessly manage environments, master data, and configurations.
- **Quality Assurance & Test Automation:** Ensure top-notch quality with specialized QA tools for WCS flow testing, SOPs, regressions, and performance.
- **Operational Reports:** Get custom SCI reports tailored to your specific needs, with or without cloud replica databases.
- **Inventory Design:** Optimize multi-channel order management and inventory segmentation for store, online, and VMI.

Our Manhattan Services

Consulting

- In-depth analysis of current warehouse operations & processes
- Custom-tailored warehouse management solutions
- Strategic planning for peak volume management
- Expert advice on inventory optimization and order fulfillment
- Risk assessment and mitigation strategies

Implementation

- End-to-End WMS system implementation
- Configuration & customization of WMS meeting specific business needs
- Integration with Enterprise systems
- Comprehensive testing & QA
- Training for staff & management, on new systems

Process Improvements

- Analysis and redesign of warehouse workflows
- Streamlining of receiving, put-away, picking, and shipping processes
- Reduction of lead times and process bottlenecks
- Enhanced inventory accuracy and reduced stockouts
- Implementation of lean warehousing principles

Production Support

- 24/7 technical support for WMS and related systems
- Rapid issue resolution to minimize downtime
- Ongoing system monitoring and performance tuning
- Regular updates and maintenance

Continuous Improvement

- Continuous assessment of warehouse operations for efficiency gains
- Implementation of best practices and industry standards
- Regular performance reviews & feedback sessions
- Development of key performance indicators (KPIs) and metrics
- Develop continuous training programs.

Technology Improvements

- Upgrading legacy systems to state-of-the-art WMS platforms
- Implementation of mobile solutions for real-time data access
- Enhancing data analytics & reporting capabilities
- Cybersecurity enhancements to protect warehouse data
- Warehouse Automations
- Design & implementation of automated storage and retrieval systems (AS/RS)
- Integration of robotics and AGV's
- Automated picking & packing solutions
- Conveyor system design & optimization
- Implementation of warehouse control systems (WCS) for seamless automation management

About EffiQ Technology Solutions Inc.

EffiQ Technology Solutions Inc. was founded with a vision to revolutionize supply chain and warehouse management. We specialize in delivering cutting-edge solutions that drive efficiency, improve productivity and unlock new levels of operational excellence.

EffiQ is a team of experienced professionals and technology experts who can support and manage enterprise software systems such as Manhattan WMS, SAP and Microsoft D365 ERP. Along with our network of business partners we help mid-size to large enterprises adopt new systems, streamline existing operations and explore latest technologies
