Do not litter on public roads.

** Value Added Tax (VAT) deductible for professionals

General Information

Vehicles parked in paid parking areas on public property must pay a fee via parking meters or the Flowbird app.

For individual residents:

- ▶ A subscription allowing them to park in their residential zone, with preferential rates.
- ▶ Alternatively, in one of the two peripheral zones of their choice, if they live within the municipal area but outside of paid parking zones.

For professionals and residents and non-resident employees:

- ▶ A subscription to park in their professional activity zone.
- ▶ Residents must choose between their residential or work zone, with no option to combine multiple zones.

For mobile professionals, both resident and non-resident:

- ▶ A subscription for all zones if their activity requires frequent travel throughout the municipality.
- ▶ They should contact the Municipal Police service to find out which APE/NAF codes are eligible.

When subscribing to a parking permit, the vehicle's license plate will be registered in the system.

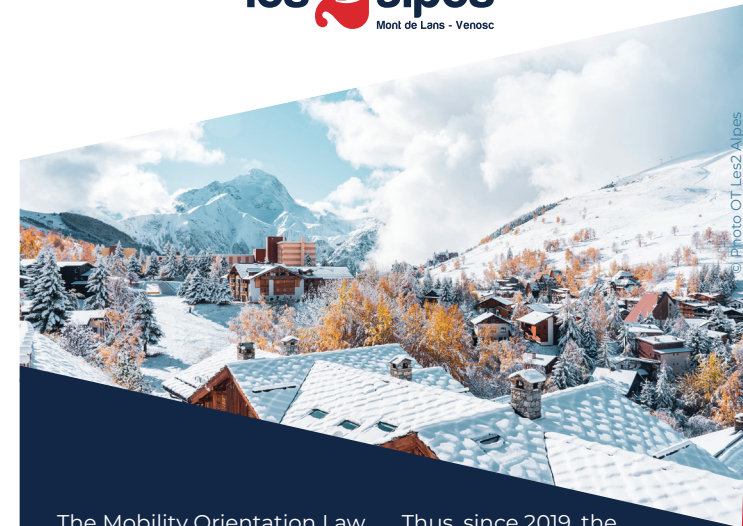

Starting from November 12, 2024, the Municipal Police Service office will be open from Monday to Friday from 9:00 AM to 11:00 AM to subscribe to a parking permit or receive assistance with the process.

FREE PARKING

CONDITIONS FOR FREE PARKING

- ▶ During the off-peak season from May 1 to June 14 and from September 1 to November 30.
- ▶ Once per day, for 30 minutes on any parking spot (1 hour on Saturdays).
- ▶ On «arrêt minute» spaces (quick stops allowed up to 30 minutes).
- ▶ In villages and hamlets.
- ▶ Everywhere for individuals holding a CMI card (disabled parking badge), as well as in accessible parking spaces for people with reduced mobility (PMR).
- ▶ For vehicles used for public service, security, rescue, or emergency missions.
- ▶ For healthcare and social workers when traveling for professional activities. Contact the Municipal Police service to know the eligible APE/NAF codes.

Practical PARKING GUIDE

The Mobility Orientation Law (LOM), adopted in France in 2019, aims to fundamentally reform public policies related to transportation and mobility. It is based on four main key areas:

- ▶ Improvement of daily transportation with more accessible, efficient, and cost-effective solutions.
- ▶ Transition to more sustainable transport through soft mobility modes and the development of infrastructure to support these transport options.
- ▶ Governance and funding: the LOM gives more responsibilities to local authorities in managing mobility.
- ▶ Innovation: by facilitating the integration of digital solutions for mobility services.

Thus, since 2019, the regulatory framework for local authorities has evolved, and the new team has decided to make the issue a priority in order to make up for delays.

Expectations and benefits of the project for the territory

- ▶ Regulatory compliance with the Mobility Orientation Law (e.g., development of cycling lanes).
- ▶ In line with ecological challenges, reduction in the number of cars on the station and their use for short trips.
- ▶ Improvement of the attractiveness of the resort centre, more suited to the development of soft mobility (shuttles, pedestrians, bicycles, etc.).
- ▶ A new source of revenue to fund the transition to soft mobility without increasing local taxes.
