ConSEP CONDENSATE CLEANERS

New larger, stronger and re-designed oil/water separator offers the most economical, simple, reliable and environmental solution for treating compressor condensate.

The ConSEP as well as having a larger volume than its competitors, it also has more filtration medium and therefore gives consistent performance and discharge levels. Far lower than UK or European consent levels (less than 5ppm at installation). With no moving parts, no static water and no oil containers, the ConSEP is clean and simple to use, with generally 6-12 months between filter bag services.

With a unique diffuser and carbon filter built into the ConSEP lid, pressurised compressed air from all types of drains can be added to the separator and it is fully functional with all types of compressors and their oils.

The new "blue bag" technology is available to retro fit competitor's condensate cleaners in a 'copy exact' format. All bag service kits and ConSEP's are available for next day delivery.

Technical Specifications - ConSEP Condensate Cleaners

Model Number	Capacity			Dimensions		Weight	Service Kit Part Number
	cfm	m3/h	m3/min	Height (mm)	Depth (mm)		
ConSEP 100	100	170	2.83	460	290	4 Kg	ConSEP 100 KIT
ConSEP 300	300	509	8.50	600	370	9 Kg	ConSEP 300 KIT
ConSEP 750	750	1254	21.25	930	500	23 Kg	ConSEP 750 KIT
ConSEP 1500	1500	2548	42.50	930	1150	40 Kg	ConSEP 1500 KIT
