

POSING NUDE ON MARS

Helpful Tips:

Don't try this at -27C!

Wait for +27C summer day.

Do not open your mouth.

Do not attempt to breathe!

In Mars' Irradiated Near-Vacuum, Watch For:

Eardrum blow outs

Cosmic radiation damage

Instant desiccation

Fizzy blood

Hypoxia

Each session (held breath limit):

Two minutes outside pressurized shelter!

Remember:

It's never a great idea to walk outside in space without protection and life-support.

FIRST INTERVIEW (rush transcript):

*Thank you for getting back. You're very pretty, Katarina.
This is news?*

*Please look through this book of Ed Weston nudes.
... wow. He gets girlfriends to take off clothes on Mars?*

*Actually in Big Sur and California's coastal dunes.
Wery... pretty. So you are not just perv?*

*I am a practiced professional. A "painter with light".
You shoot nudes before?*

*I don't "shoot" people.
I am happy to hear this.*

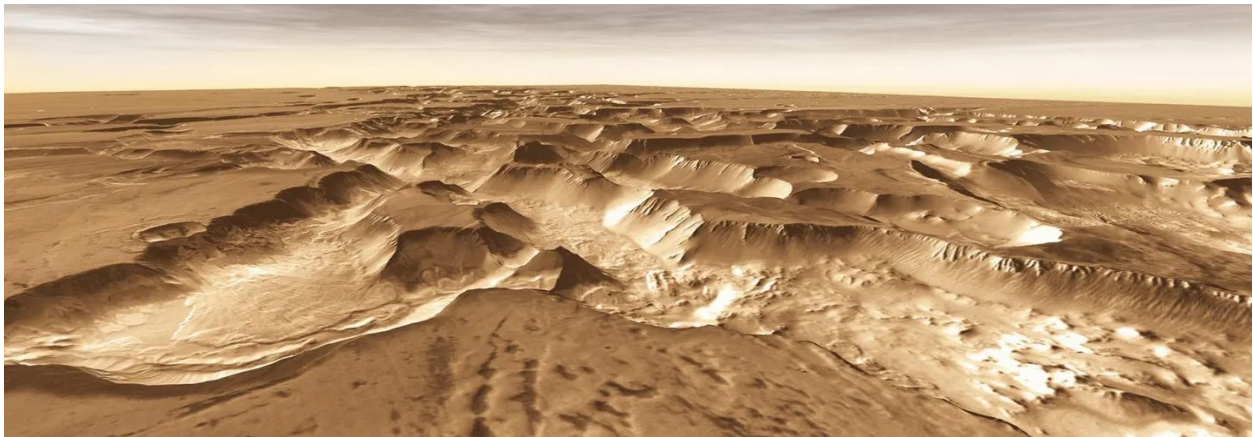

*One thing, when posing watch out for micro-meteorites.
How I will be seeing them?*

*You won't. They're too small and traveling too fast.
But not always, yes?*

*Certainly not. Meteor strikes on Mars are strictly random.
But not forbidden. How often this space junk?*

*There is no danger from any meteor. Unless you're hit.
How much you insure me?*

*Liability insurance? On MARS? (laughs)
Now I need more better fee.*

*I can pay you \$800,000 for each 2-minute setup on Mars.
You will pay 2 millions each minute I bare ass outside.*

*How many setups are you willing to do?
Depends on first one. If I still alive.*

*A rover with a Mars-trained paramedic will be nearby.
Also on board shower-vac to clean all sand dusts.*

*Nothing will go wrong. I have too much invested.
On true art or crazy stunt?*

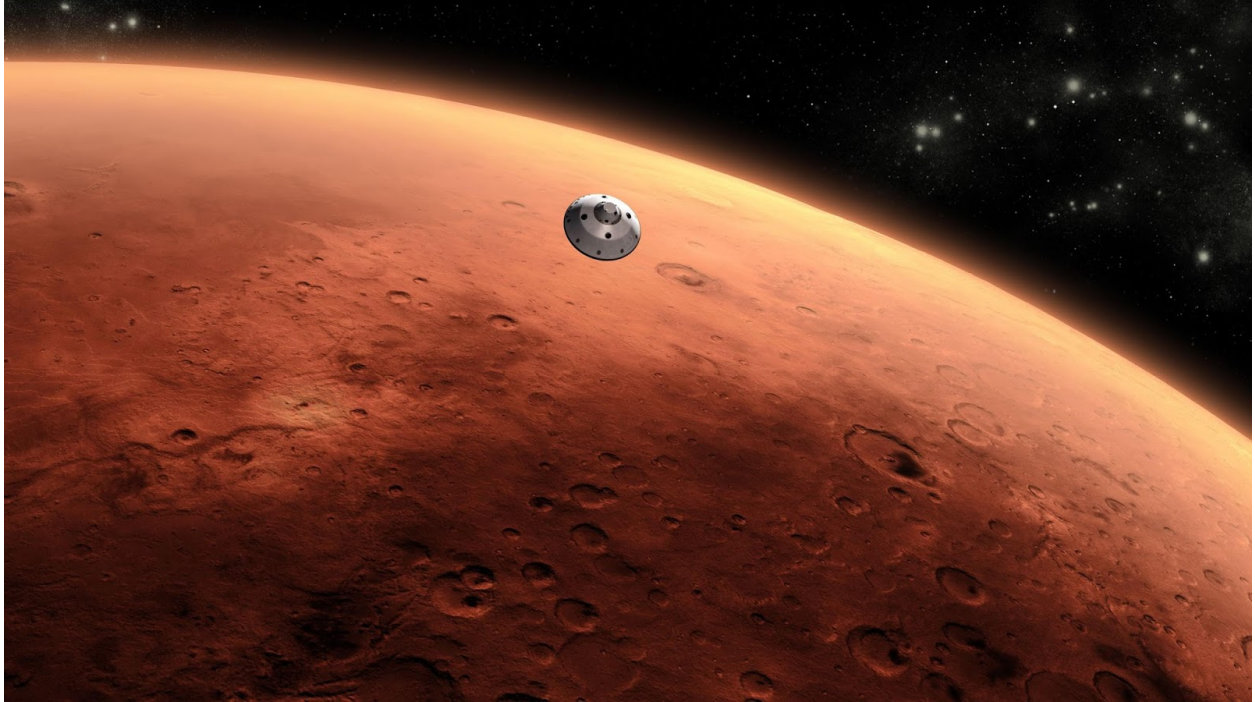

*These will be the most iconic nudes in photography.
What if Martian divas angry?*

*What do you suggest?
First, proper ceremony. Ask Mars blessing.*

*For the Planet of War to again embrace the Feminine?
Da! You know Bradbury and *The Sea Kings of Mars*.*

*I propose equatorial (80 F) locations during summer.
Valles Marineris ice fog also wery mysterious for nude.*

Since this is entirely my idea, I will own all rights.
Since this risk my all life, my agent will contact you.

Who gets final choice of images?
If not our both votes for content, image file deleted.

Starlink and Olympus Hilton will cover your expenses.
Why?

Next Perihelic Opposition is in five weeks. Then it's just...
35 million miles to awaken dead planet with Eros energy!

Can you be ready by then?
I always packed for Mars. No problem.

The trip out will only take around seven months.
In "total dark". Black sky only. No nice stars.

You will see them. But too distant and faint for selfies.
Then wait one year for return launch window.

I am sure you will enjoy the nightlife at Noctis City.
I am sure I will come to see Red Planet.

You will find everything here. Except air and trees.
I bring skis, radiation block, space tent and Pushkin.
