

Workplace Safety: Cleaning Materials from Tailgates

Before exiting the cab ensure the tailgate lever is in the open position and no one else will be inside the cab moving the tailgate lever to the closed position without the drivers knowledge

Use a suitable object (Small Brush) to clean tailgate dogs

Do not put your fingers inside the tailgate locks to remove loose material

When checking / cleaning around the tailgate, ensure that the tailgate lock is disengaged. Do not put your fingers inside the tailgate locks to remove loose material, use a suitable object (such as a small brush)

Ensure that no one else is inside the cab that could operate the tailgate lever and make sure no one is in close proximity to the tailgate when activating the tailgate locks
