

AERO FOLD

VYOMA - 25

Introduction

AERO FOLD IS A PAPER PLANE COMPETITION THAT IS DESIGNED TO TEST PARTICIPANTS SKILLS IN AERODYNAMICS, DESIGN AND THROWING TECHNIQUE. THIS RULE BOOK ENSURES FAIR PLAY AND STANDARDIZES COMPETITION PROCEDURES.

OBJECTIVES

DISTANCE

To have travelled the farthest

AIRTIME

**To have the longest airborne
time**

ACCURACY

**To land as close as possible to the
desired target**

RULES

- Each participant will be provided with two standard A4 size sheets
- The paper must be unmodified i.e no use of tapes, glues, staples or weights
- The participants will be given 15 mins to make their paper plane
- The participants must throw within the throwing zone
- Each participant gets 2 attempts. On failing to launch properly or if launched beyond the launch zone then that attempt will not be considered

SCORING AND JUDGING

- **DISTANCE** - Measured from the throw line to the point where the paper plane stops on the ground . The distance is measured in a straight line from the launch zone
- **AIRTIME** - The time starts from when the plane is released and stops when it touches the ground. It is measured using a stop watch
- **ACCURACY** - A target region will be marked on the ground within which the plane must land to obtain maximum points. The distance is measured from the plane's closest point to the region. For a plane which overshoots the region, the distance by which it overshoots will be subtracted from the total distance traveled

DISQUALIFICATION

- Any use of modified paper or external aids will lead to direct disqualification
- Failing to complete the build of the paper plane within the allotted time or the given number of sheets will lead to disqualification
- Participants who crosses the launch zone after receiving the first warning will be disqualified
- Participants who pose an unsportsmanlike conduct will be disqualified
- JUDGES AND ORAGNIZERS DECISION IS FINAL

PRIZE

PRIZE POOL OF Rs 3,000 and CERTIFICATES TO THE TOP 3 PARTICIPANTS
