

YOUR ULTIMATE GUIDE TO KANGEN WATER

Leveluk **k8**

KANGEN
WATER

pH 7.0

pH 9.5

pH 6.0

pH 8.0

pH 2.5

pH 8.5

Setting

USA

The system has been tested and certified according to NSF/ANSI 42 for reduction of chlorine, NSF/ANSI 372 for lead and copper, and NSF/ANSI 55 for Total Organic Carbon (TOC) reduction. See performance data sheet for specific performance data.
Replacement Filter: HCN-FR
Operating Temperature: Max. 35 degrees C / 95 degrees F
Operating Pressure: Max. 400kPa (60 PSI)

TRANSFORM YOUR WATER. TRANSFORM YOUR LIFE.

WATER: THE FOUNDATION OF LIFE

Water isn't just a resource, it's life itself. Making up 60-70% of the human body, water is at the heart of every biological process that keeps us alive and thriving.

But not all water is created equal.

Tap water is riddled with chemicals, bottled water sits stagnant in plastic, and purified water is stripped of essential minerals. This water, instead of nourishing your body, may be holding you back, leaving you dehydrated, acidic, and out of balance.

Enter Kangen Water®.

For over **four decades**, Enagic® has been at the forefront of water innovation, crafting **Kangen Water® systems** that combine Japanese engineering precision with modern science. Kangen Water® doesn't just hydrate, it revitalises, restores, and renews at a cellular level. From homes to global industries, this water is changing lives.

WHAT IS KANGEN WATER®?

"Kangen" means "**return to origin**" in Japanese, and that's exactly what Kangen Water® offers: restoring water to its original, alkaline, antioxidant-rich, and restructured state.

Produced through Enagic's advanced water ionisation technology, Kangen Water® supports hydration, health, and sustainability in ways no other water can.

Through the process of **electrolysis**, Kangen Water® is infused with **molecular hydrogen (H₂)**, one of the most powerful antioxidants in existence. It penetrates your cells faster, reduces oxidative stress, and helps your body fight the free radicals that cause inflammation, fatigue, and aging.

With Kangen Water®, every drop is alive, clean, and full of life-changing potential.

The Science of Kangen Water®

Kangen Water® is:

- **ANTIOXIDANT:** Rich in molecular hydrogen (H₂), a powerful antioxidant that neutralises free radicals, reduces oxidative stress, and supports overall cellular health.
- **ALKALINE:** With a pH range of **8.5–9.5**, Kangen Water® helps restore balance to the body, counteracting acidity caused by processed foods, stress, and modern lifestyles.
- **RESTRUCTURED:** Micro-clustered water molecules penetrate cells faster, delivering **superior hydration** and nutrient absorption.

Unlike conventional water filters, Kangen Water® systems preserve essential minerals like calcium, potassium, and magnesium while removing harmful contaminants, chlorine, and sediment.

Why Kangen Water® Stands Above the Rest

Unlike bottled or purified water, Kangen Water® doesn't just hydrate, it transforms your life.

- **Rich in Antioxidants:** Molecular hydrogen fights oxidative stress, reducing inflammation and promoting cellular health.
- **Restores Balance:** Alkaline water counters acidity, bringing your body back to its natural, healthy pH.
- **Retains Essential Minerals:** Kangen Water® keeps vital minerals intact while removing contaminants.
- **Eco-Friendly:** Reduce plastic waste and chemical cleaners with one sustainable system.

Whether for drinking, cooking, cleaning, or beauty, Kangen Water® is the key to a healthier, more vibrant life.

FIVE TYPES OF KANGEN WATER®

One Machine. Endless Possibilities.

Kangen Water® machines produce five unique types of water, each serving a distinct purpose. From powerful cleaning to deep hydration, Kangen Water® is your all-in-one solution for health, home, and beyond.

Why settle for ordinary water when you can drink the water your body was made for?

1. Strong Kangen Water (pH 11.5)

The ultimate **chemical-free cleaning solution**

- Removes **pesticides and oils** from fruits and vegetables, ensuring every bite is clean and safe.
- Cuts through grease and grime, perfect for dishes, surfaces, and laundry.
- A **non-toxic alternative** to chemical cleaners, protecting your family and the environment.

2. Kangen Water® (pH 8.5–9.5)

The ultimate solution for **hydration and wellness**.

- Restores your body's natural pH balance, countering acidity caused by stress, diet, and lifestyle.
- Packed with essential minerals like calcium, potassium, and magnesium to nourish your body.
- Enhances cooking: Makes vegetables crispier, rice fluffier, and flavours more vibrant.
- Ideal for pets, plants, and the whole family.

3. Neutral Water (pH 7.0)

Clean, chlorine-free water for sensitive needs.

- Perfect for preparing **baby formula** or taking medications.
- Gentle on sensitive systems while delivering clean hydration.

4. Beauty Water (pH 6.0)

Your **natural beauty secret**, straight from the tap.

- Enhances skin and hair health, leaving them soft and radiant.
- A natural **astringent** that tones and tightens your skin.
- A sustainable alternative to chemical-based beauty products.
- Chemical-free alternative for cleaning mirrors, windows, and surfaces.

5. Strong Acidic Water (pH 2.5)

A powerful **sanitiser** for professional and personal use.

- Kills bacteria, viruses, and pathogens.
- Sanitises surfaces, utensils, and medical equipment.
- Gentle on the skin as a **natural hand sanitiser**.

APPLICATIONS ACROSS INDUSTRIES

Healthcare & Wellness

Hospitals, clinics, and wellness centres trust Kangen Water® for its:

- **Hydrating properties** for recovery and treatment.
- Beauty Water for non-invasive skincare.
- Strong Acidic Water for sanitising equipment and surfaces naturally.

Food Service & Hospitality

Restaurants, hotels, and cafés elevate their service with Kangen Water®:

- Enhance the **flavour and freshness** of meals.
- Clean kitchens, dishes, and produce without chemicals.
- Reduce costs and waste with an eco-friendly solution.

Fitness & Athletics

Athletes, gyms, and recovery centres rely on Kangen Water® for:

- Faster recovery from oxidative stress.
- Superior hydration for peak performance.

Home & Personal Use

From cooking to cleaning, hydration to beauty, Kangen Water® is the foundation for:

- A chemical-free home.
- Healthier, happier families.
- Sustainable living.

WHY CHOOSE ENAGIC®?

Enagic® International is a global leader in water ionisation systems. With decades of experience, innovation, and a commitment to wellness, we are revolutionising hydration for individuals, families, and industries worldwide.

Unmatched Quality and Innovation

Each Kangen Water® ioniser is crafted in Japan to exacting standards, certified to **ISO 9001, ISO 14001, and ISO 13485**. Every unit undergoes meticulous testing and inspection to ensure durability, performance, and safety.

A Legacy of Trust

For over 40 years, Enagic® has led the world in water ionisation technology, earning recognition from the **Water Quality Association (WQA)** and the **Direct Selling Association (DSA)**.

Sustainability Focus

Kangen Water® eliminates the need for chemical-laden cleaning products, bottled water, and single-use plastics, reducing your carbon footprint while saving money.

EXPERIENCE THE KANGEN WATER® DIFFERENCE

Whether you're enhancing your personal health, transforming your business, or pioneering sustainable solutions in your industry, Kangen Water® empowers you to lead with confidence.

Take the first step toward **healthier living, cleaner environments, and greater well-being**.

Change your water. Change your life.

For more information about Kangen Water® and how it can transform your health, home, or business, contact your Enagic® representative today.

Join the Kangen movement and experience the water that changes everything.

**CHANGE YOUR WATER.
CHANGE YOUR LIFE.**

A white Leveluk K8 Kangen Water machine is shown. To its left is a bouquet of flowers, including a protea and some small white flowers. In the foreground, a glass of water with small bubbles is visible. The machine has a digital display showing 'KANGEN WATER' and various pH levels. A white hose is connected to the top of the machine.
